Contents

NO 1 JANUARY 1972

Letters to the editor

- L1 *H Alloul and P Bernier* · Electron spin relaxation $\text{Cu}^{63} \text{ T}_1$ in dilute CuMn alloys: Dipolar relaxation
L6 *G Williams* · Sign of the effective exchange integral for Gd in Mg
L8 *N A Surplice and R J D'Arcy* · Reduction in the work function of stainless steel by electric fields

Papers

- 1 *C S G Cousins* · Electrostatic contributions to all first, second and third order elastic constants of hexagonal metals for a range of axial ratios
7 *G C Peterson and T Smith* · X ray scattering by phonons in aluminium
19 *S Mahajan* · Evaluation of slip patterns observed in association with deformation twins in Mo-35 at % Re alloys
24 *A Myers, S G Porter and R S Thompson* · The radio frequency size effect in cadmium
38 *R A Ballinger* · Fermi surface optimization for gold
43 *D Beaglehole and M Wihl* · Optical studies of the electronic structure of aluminium-manganese and aluminium-copper alloys
55 *U K Poulsen and D S Falk* · Harmonic oscillations in the surface impedance of thin metallic slabs
63 *J E Inglesfield* · A new impurity calculation
68 *J E Inglesfield* · Phase changes in CuAu and the two dimensional Ising model
73 *J B Van Zytveld, J E Enderby and E W Collings* · Electrical resistivities of liquid alkaline earth metals
79 *P Blood and D Greig* · The low temperature electrical resistivity and thermoelectric power of palladium-platinum alloys
89 *R G Hampshire and M T Taylor* · Critical supercurrents and the pinning of vortices in commercial Nb-60 at % Ti
107 *D C Lancashire* · Electron-electron interactions in superconductors
115 *J S Brown* · Dielectric screening in palladium
123 *R Olafsson and J F Allen* · Field penetration into type I superconducting cylinders
133 *W E Gardner, J Penfold, T F Smith and I R Harris* · The magnetic properties of rare earth-Pd₃ phases
151 *D Chatterjee and K N R Taylor* · Magnetic and structural properties of the neodymium-dysprosium alloy system
159 *J Mathon* · Pressure dependence of the magnetization in the itinerant electron model of ferromagnetism

- 169 *B L Jensen, R Nevald and D L Williams* · Single crystal studies of electric field gradients in dilute alloys: II—Copper based crystals
- 180 *C Norris and L Wallden* · Photoemission from Pb
- 189 *P D Paddalia and S N Gupta* · White line in the L absorption spectra of ^{72}Hf to ^{79}Au
- 199 *M R Steel and D M Treherne* · Optical properties and electronic structure of AuMn and AgMn alloy systems

NO 2 MARCH 1972

Letters to the editor

- L11 *H Mehrer* · Correlation factor for impurity diffusion by a divacancy mechanism in an fcc lattice
- L14 *P D Pathak and N M Pandya* · Anharmonic contribution to the thermal expansion of Al, Cu, and Ag at high temperatures
- L17 *D A Huntley and M J Apps* · Magnetoreflexion study of the band structure of antimony
- L21 *A Ludwig and M J Zuckerman* · Fluctuations in superconducting alloys containing magnetic impurities
- L25 *M J Zuckermann* · Effects of localized spin fluctuations on the high temperature resistivity of AlMn
- L30 *G K White* · Thermal expansion of platinum at low temperatures
- L32 *K N R Taylor and G J Primavera* · Intrinsic coercivity in $(\text{Tb}, \text{Y})_2\text{Co}$
- L36 *B D Padalia, S N Gupta and V Krishnan* · White line at the L_{11} absorption edge of iridium metal

Papers

- 209 *R A MacDonald* · Neutron scattering due to lattice distortion around point defects
- 219 *D E Evans and P J Black* · Interference between nuclear resonant and Rayleigh-Thomson scattering from magnetized crystals of iron
- 231 *W D Rowland and J S White* · The determination of the elastic constants of beryllium in the temperature range 25 to 300°C
- 237 *N Yoshida, R Oshima and F E Fujita* · Recovery and grain growth of gold thin film deposited on the cold substrate
- 247 *B Prasad and R S Srivastava* · Lattice dynamics of noble metals
- 257 *S S Kushwaha* · Theoretical phonon spectra and heat capacity of zirconium
- 262 *H M Ledbetter* · An approximation of θ_{elastic} for cubic metals
- 270 *M Rasolt and R Taylor* · Pseudopotentials from the variable phase approach to scattering theory
- 277 *M R Howells and P E Osmon* · A new approach to positron angular correlation studies
- 289 *D A Greenwood and V R Ratti* · The stability of negative ions in liquid metals
- 297 *M G Ramchandani* · Effect of pressure on the Fermi surface of gold
- 302 *H Büttner and F Gerlach* · Gap states in small superconducting particles

- 306 *E Papp* · Effect of hydrostatic pressure on some critical parameters of superconducting InBi alloy
- 316 *A M Guénault* · Some remarks on the validity of the Nordheim-Gorter rule for thermoelectric power
- 232 *H C Jamieson and F D Manchester* · The magnetic susceptibility of Pd, PdH and PdD between 4 and 300 K
- 337 *J A Ricoteau and D Melville* · Model of the antiferromagnetic-ferromagnetic transition in FeRh alloys
- 351 *E J Hayes, A Hahn and E P Wohlfarth* · A contribution to the linear low temperature specific heat of dilute alloys arising from superparamagnetic clusters
- 358 *J Moss and P J Brown* · Spin density distribution in iron-silicon alloys
- 373 *C J Ford, J Heighway and E F W Seymour* · Magnetic properties of lead alloys in the solid and liquid states
- 386 *C Mehrota* · Localized magnetic moment in a dilute alloy
- 395 *A Kisiel and P M Lee* · Relativistic effects on energies of optical transitions in $\text{Cd}_x\text{Hg}_{1-x}\text{Te}$ alloys
- 403 *A G Mathewson and H P Myers* · Optical absorption in aluminium and the effect of temperature
- 416 *Corrigendum*

NO 3 MAY 1972

Letters to the editor

- L39 *A G Mathewson, H Aronsson and L G Bernland* · The conduction electron optical mass in pure silver
- L42 *M P Das and S K Joshi* · The optical spectra of α brass
- L44 *A M Stewart* · Giant, dwarf, and negative moments of samarium in metals
- L47 *I A Campbell* · Indirect exchange for rare earths in metals
- L51 *S P McAllister and R Turner* · The partial structure factors at zero wavevector for binary liquid alloys
- L55 *G B Smith* · Magnetization of nearly magnetic dilute alloys
- L60 *U Kayser* · The activation of the martensitic phase transformation in ferrous alloys by stimulated emission of phonons
- L65 *S Tanigawa, S Nanao, K Kuribayashi and M Doyama* · Apparent extinction of the $\langle 111 \rangle$ neck effect in the angular correlation of positron annihilation in a dilute Cu-Mn single crystal by quenching

Papers

- 417 *A M Stoneham* · Quantum theory of diffusion: temperature dependence of diffusion of light interstitials in Debye solids
- 421 *W G Stirling, R A Cowley and M W Stringfellow* · Crystal dynamics of Pd_3Fe at 80 K
- 426 *G Bose, H C Gupta and B B Tripathi* · Noncentral forces in the study of lattice dynamics of metals
- 433 *M J Duggin* · The thermal conductivities of liquid lead and indium

- 441 *C J Coombes* · The melting of small particles of lead and indium
- 450 *G Mukhopadhyay* · A study of the electronic energy bands for α and γ cerium
- 459 *R M J Cotterill, K Petersen, G Trumpy and J Trdřf* · Positron lifetimes and trapping probabilities observed separately for vacancies and dislocations in aluminium
- 468 *F Ducastelle* · On some generalizations of the coherent potential approximation in the disordered alloy problem
- 487 *N J Coenen and A R de Vroomen* · Phase shift parametrization of the Fermi surfaces of the noble metals
- 499 *E Kovács-Csetényi, F J Kedves, L Gergely and G Grüner* · High temperature impurity resistivity in dilute AlMn alloys
- 503 *R J White* · A weak resistance minimum in AuTi
- 510 *D G Walmsley* · Force free magnetic fields in a type II superconducting cylinder
- 529 *D G Walmsley* · Force free magnetic fields in a type II superconducting sphere
- 547 *J Lowell* · Investigation of pinning centres in superconductors by means of alternating currents I. Theory
- 559 *J Lowell* · Investigation of pinning sites in superconductors by means of alternating currents II. Experiments
- 574 *C M K Watts* · Dynamical screening effects in the Auger spectrum of metals
- 584 *K N R Taylor, D Melville and G J Primavesi* · Intrinsic magnetic aftereffect in $\text{Dy}(\text{Co}, \text{Ni})_2$
- 592 *J M Titman and B M Moore* · Nuclear spin relaxation and translational diffusion in dilute alloys of lithium
- 605 *M R Steel* · Optical absorption studies of AuCr and AuV alloy systems
- 615 *T E Cranshaw* · The disturbance produced in an iron lattice by Cr atoms and some other solutes

NO 4 JULY 1972

Letters to the editor

- L69 *V K Tewary and R Bullough* · Theory of the void lattice in molybdenum
- L73 *M J Norgett, R C Perrin and E J Savino* · Computer simulation of edge and screw dislocations in copper
- L76 *M C Knoop and A R De Vroomen* · Influence of mass spread on the line shape of Azbel-Kaner cyclotron resonance
- L80 *O Takai, T Fukusako, R Yamamoto and M Doyama* · Electrical resistivity of interstitials in aluminum
- L83 *J B Sousa, M R Chaves, R S Pinto and M F Pinheiro* · Measurement of the resistive anomaly in NiCu alloys near the Curie point
- L87 *N Rivier and V Zlatić* · Temperature dependence of the resistivity due to localized spin fluctuations

Papers

- 625 *A A Cottley* · The relation between Halpern's theory of size effects and the mean free path method

- 629 *S Balibar, B Perrin and A Libchaber* · Electromagnetic waves and quantum effects in aluminium
- 643 *P T Coleridge and I M Templeton* · High precision de Haas-van Alphen measurements in the noble metals
- 657 *T Arundsen and P Jerstad* · Audio frequency helicons in aluminium
- 672 *S P Singh and W H Young* · Heats of solution for simple binary alloys
- 683 *H R Brown and A Myers* · Electron lifetimes in silver alloys
- 693 *N H Sze and G T Meaden* · Critical divergence of the thermal resistivity at the Néel point of europium
- 699 *D Greig and D Livesey* · The Hall coefficient of dilute palladium and platinum alloys
- 709 *O Dreirach, R Evans, H-J Güntherodt and H-U Künzi* · A simple muffin tin model for the electrical resistivity of liquid noble and transition metals and their alloys
- 726 *M Singh and G S Verma* · Temperature dependence of the electrical resistivity and the thermoelectric power of lead
- 729 *R Fletcher, A J Friedman and M J Stott* · The Righi-Leduc and Hall coefficients of the noble metals
- 742 *C G Windsor* · Interband contributions to the generalized spin susceptibility of chromium
- 749 *F de Pasquale, P Tombesi and G Morandi* · Renormalized theory of local spin fluctuations in metals
- 761 *G J Primavera and K N R Taylor* · Magnetic transitions in the rare earth intermetallic compounds R_2Ni and R_2Co
- 771 *P S Scanlan and J E Hebborn* · Wave number dependent magnetic susceptibilities for nearly free electrons
- 782 *Gee-Swee Poo* · Low temperature magnetic susceptibility in the infinite U Anderson dilute alloy model
- 797 *W N R Stevens* · Direct fitting of spin wave energies to interatomic exchange parameters in the ferromagnetic rare earth metals
- 806 *B E A Fisher* · A theory of spin waves in chromium
- 816 *K Sturm* · Phonon effects in the optical absorption of the alkali metals
- 832 *Corrigendum*

NO 5 SEPTEMBER 1972

Letters to the editor

- L93 *A W Sleeswyk* · Accommodation of $\{112\}\langle 111 \rangle$ deformation twins in the bcc lattice by $\frac{1}{2}\langle 111 \rangle$ dislocations
- L95 *S Tanigawa and M Doyama* · The heat of solution of Cs-Rb and Cs-K alloy systems in the pseudo alloy atom model
- L99 *N Rivier and V Zlatić* · Temperature dependence of the resistivity due to localized spin fluctuations II.—Coles alloys
- L105 *C A Poldy and K N R Taylor* · Magnetization minima in yttrium-cobalt-nickel pseudobinary compounds
- L109 *A J Bray and G Rickayzen* · A selfconsistent treatment of fluctuations in superconductors beyond the Hartree approximation

- L114** *S J Campbell, P E Clark and P R Liddell* · Distribution of nearest neighbour atoms in CuFe alloys

Papers

- 833** *C M Bertoni, V Bortolani and G Giunchi* · Thermodynamic properties of alkali metals
- 842** *J W Martin* · The electrical resistivity of some lattice defects in fcc metals observed in radiation damage experiments
- 854** *D M Barnett, R J Asaro, S D Gavazza, D J Bacon and R O Scattergood* · The effects of elastic anisotropy on dislocation line tension in metals
- 865** *G K White* · Thermal expansion of Ca, Sr and Ba at low temperatures
- 873** *R Weber and R Street* · The heat capacity anomaly of chromium at 311 K
- 878** *J Inglesfield* · The electronic structure and physical properties of metallic solid solutions: Mg in Li and Al in Li
- 893** *A H Nayyar and D Sherrington* · Magnon-phonon interaction in rare earth metals with helical spin structures
- 905** *M J Rice and J Bernasconi* · Simple phenomenological model for the optical conductivity and dielectric constant of quasi one dimensional metallic conductors
- 915** *B Hayman and J P Carbotte* · Anisotropic transport scattering times in the alkali metals
- 925** *K K Chia, K C Wong and R L Jacobs* · Rapidly convergent pseudopotentials: application to lithium
- 930** *J A Clark and P G Dawber* · Theory of alloys, a coherent pseudopotential model
- 939** *A J Friedman and R Fletcher* · The Righi-Leduc and Hall coefficients of Ag alloys
- 946** *T F Smith* · Pressure dependence of the superconducting transition temperature for vanadium
- 957** *J G Park* · Voltage pulses produced by the motion of vortices in superconductors
- 966** *J B Parkinson* · Ginsburg-Landau theory of fluctuations in superconductors of small dimensions
- 972** *G A Saunders and Z Salmengen* · Magnetoresistivity tensor components at intermediate magnetic fields in quenched and annealed bismuth
- 978** *M S S Brooks* · Magnetoelastic effects in the rare earth metals
- 982** *J S Carlow and R E Meads* · The iron-palladium-hydrogen alloy system
- 995** *Corrigenda*

NO 6 NOVEMBER 1972

Letters to the editor

- L119** *K Malen* · The force on a crack deviating from its original plane
- L123** *G M Stocks, G D Gaspari and B L Gyorffy* · Pressure induced superconductivity in cesium
- L129** *T L Tam, M O Steinitz and E Fawcett* · Anisotropy of the magnetostriction of V, Mo and W

- L132** *J Slechia and R V Aldridge* · A matrix formulation of the coherent potential approximation

Papers

- 997** *J W Martin and R Paetsch* · Interaction of positrons and dislocations
- 1009** *N Yoshida and F E Fujita* · Influence of oxygen on vacuum deposited iron thin film
- 1016** *P T Coleridge* · Impurity scattering in copper
- 1033** *G O Arbman and S Hörnfelt* · Crystal potentials and the band electrons of iridium
- 1046** *P L Srivastava and N Mishra* · Phonon frequencies and electrical resistivity of rubidium by the optimized model potential method
- 1055** *R C Harford* · A k dependent potential for bands in metals I. Theory
- 1062** *S L Altmann, R C Harford and R G Blake* · A k dependent potential for bands in metals II. Calculations; Ca and Al
- 1070** *F Brouers and J Van der Rest* · Theory of binary alloys of different constituent bandwidths
- 1092** *D Roy, A Manna and S P Sen Gupta* · The applications of the Morse potential function in ordered $\text{Cu}_3\text{Au}_3\text{Cu}$ alloys
- 1100** *C F Osborne* · Impurities in 3d transition metals: correlation effects in narrow energy bands
- 1114** *A J Bray and G Rickayzen* · On the AC conductivity of thin superconducting films in the transition region
- 1124** *A K Theophilou* · An analytic estimate of the field penetration into metal surfaces
- 1137** *A P Murani and B R Coles* · Some magnetic and transport properties of Rh-Mn alloys
- 1145** *P Lloyd and C F Osborne* · Quasielastic neutron scattering from metals with paramagnetic impurities
- 1151** *R Harris and M J Zuckermann* · The resistivity of paramagnetic palladium-nickel alloys: an average T matrix calculation
- 1162** *E Claridge, D S Moore, E F W Seymour and C A Sholl* · Nuclear quadrupole interactions in liquid alloys
- 1174** *M K Gupta and K Nigam* · X ray K absorption edge of nickel in some of its compounds
- 1179** *D A O'Connor, M W Reeks and G Skyrme* · Mössbauer effect study of the lattice dynamics of iron impurities in Al, Rh, Pd, V and Mo metals
